

SOUTHEAST REGIONAL SERVICE COMMISSION

# 2021

ANNUAL REPORT

Presented to

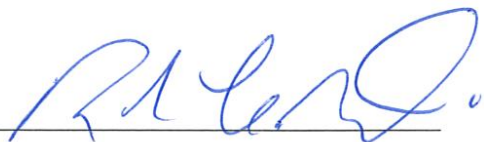

The Honourable Daniel Allain,  
Minister of Local Government and Local Governance Reform  
and  
Mayors and Local Service District Representatives of the  
Southeast Regional Service Commission

The Southeast Regional Service Commission  
hereby respectfully submits its  
9th Annual Report of activities for the year 2021

---

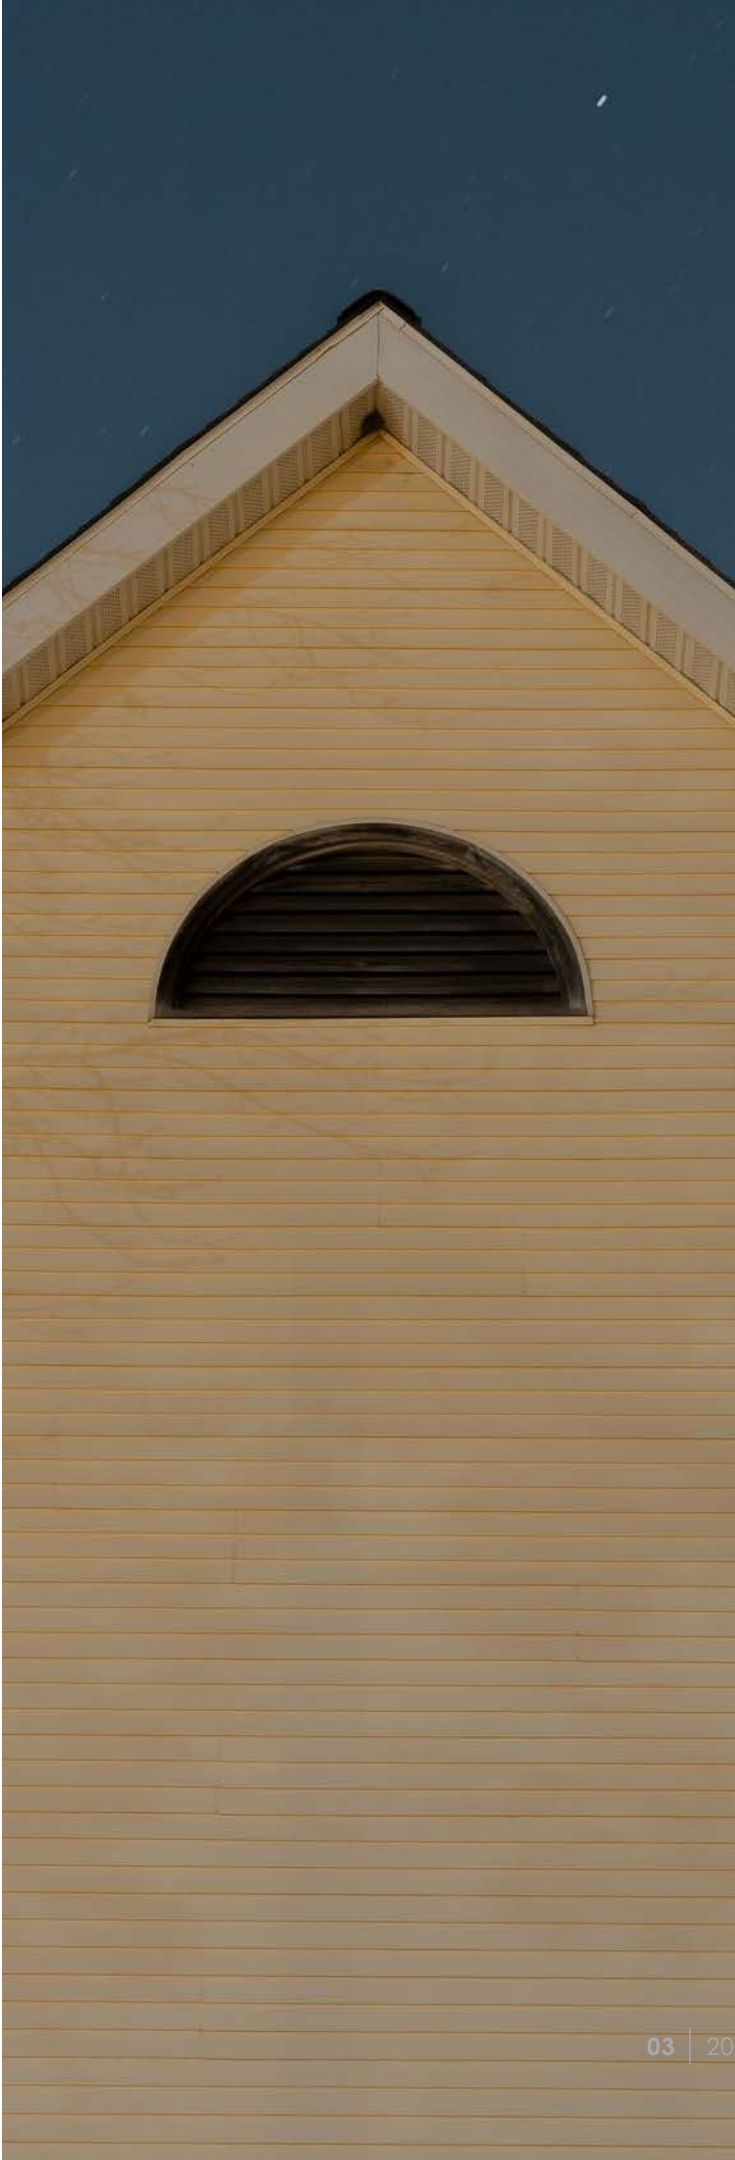

Mayor Roger Caissie

## Message from the **CHAIR**

2021 was a year full of challenges, successes, and grief.

We were deeply saddened by the passing of our former Chair of the SERSC and long-time board member, Jerry Gogan in June. Jerry was always very passionate about regional collaboration and environmental protection. He is deeply missed, and we offer our most sincere condolences to his wife Leslie and his entire family.

The Covid pandemic persisted for a second year and continued to cause the Board and staff to readjust to an ever-changing environment. As a result, most Board and Committee meetings were held virtually, and the Executive Committee met regularly to monitor the situation. I would like to thank all Board Members and alternates for their cooperation and engagement throughout the year.

As you will see in this report, despite this pandemic, all departments had record years and continued to improve the delivery of services to taxpayers. Eco360, the solid waste division, saw record revenues and tonnages for recyclables and launched two new programs: the Re-Use Expo and the Glass Recycling Program. The planning division was rebranded to Plan360 and had a record year of building permits due to a massive construction boom in our region. The Finance Department processed a record number of transactions and worked on several projects improving the finances of our Regional Service Commission. A huge thank you to Department Heads and all staff for their hard work and dedication during these challenging times.

In November, the Province tabled a white paper entitled "Working together for vibrant and sustainable communities" which will significantly change the regional service commission model and is a substantial opportunity to provide better services to everyone in our region.

Several municipalities and Local Service Districts will be restructured in our region, leading to a new Board composition. In addition, the Regional Service Commission will have a number of new services to provide in the region, including economic development, tourism promotion, community development, regional transportation, recreational infrastructure cost-sharing, and an additional focus on social development.

We look forward to working together with all the region's stakeholders to develop and implement these new mandated services in a way that can benefit all residents of southeastern New Brunswick for years to come.

Roger Caissie, Chair

## Message from the **EXECUTIVE DIRECTOR**

To say the least, it's been a tough couple of years. The Covid pandemic continued throughout 2021 and brought many challenges to our operations, but our staff were quick to adapt to the changing environment. As such, they were able to continue to provide a high level of service and break records in each Department.

The Finance Department led the charge on a HST recovery project which resulted in significant savings for Eco360. They also worked on the integration of the Greater Moncton Mosquito Control program, all while successfully processing over 150,000 transactions throughout the year.

The Planning Department was rebranded to Plan360 to help communicate their message and better identify their services to the communities they serve. Due to a substantial construction boom in the region, they processed a record number of building permits. The record year meant an increased workload on staff, and they implemented several changes to workflows to assure the processing of all building and development services in a timely manner. They also continued to work on the Shoreline Trail which promises to be a tremendous benefit to the region once completed.

Eco360, the solid waste division, had a record year for revenues and tonnages from recyclables, mainly due to increased market prices and volume shipped. Two new programs were launched: the Reuse Expo and the Glass Recycling Program. Both programs were well received by the public and will continue to grow over time. The Mobile Eco-Depot program and the new public drop off continued to be much appreciated by residents. Staff also worked on the transformation of our landfill gas to a renewable natural gas and the province's Extended Producer Responsibility Program for Packaging and Printed Paper. Both projects could substantially increase our revenues and help reduce our carbon footprint.

Corporately, staff were very involved in local governance reform which will significantly change the structure of our Regional Service Commission and the services we offer.

In closing, I would like to thank the Board for their support and counsel during the year and Department Heads and staff for their hard work and dedication so that the Southeast Regional Commission can continue to lead the province in providing top quality service to its residents.

Roland LeBlanc, Interim Executive Director

# Southeast REGIONAL PROFILE

In January 2013, twelve Regional Service Commissions were created in New Brunswick. The mandate of the Regional Service Commissions (RSCs) is to deliver services to communities for land use planning and solid waste management, to facilitate voluntary service arrangements among interested communities, and to act as a forum for collaboration among communities on regional issues.

The Southeast Regional Service Commission includes the counties of Westmorland and Albert, located in the Southeastern region of New Brunswick bordering the Bay of Fundy, the Northumberland Strait and the Province of Nova Scotia. Encompassing two cities, three towns, nine villages, one rural community and 24 local service districts, this newly appointed Regional Service District (herein referred to as "the region") is the most populated in New Brunswick.

Due to the outdated statistics and the Municipal Reform, the community profile will be updated in the 2022 Annual Report.

# GOVERNANCE & ADMINISTRATION

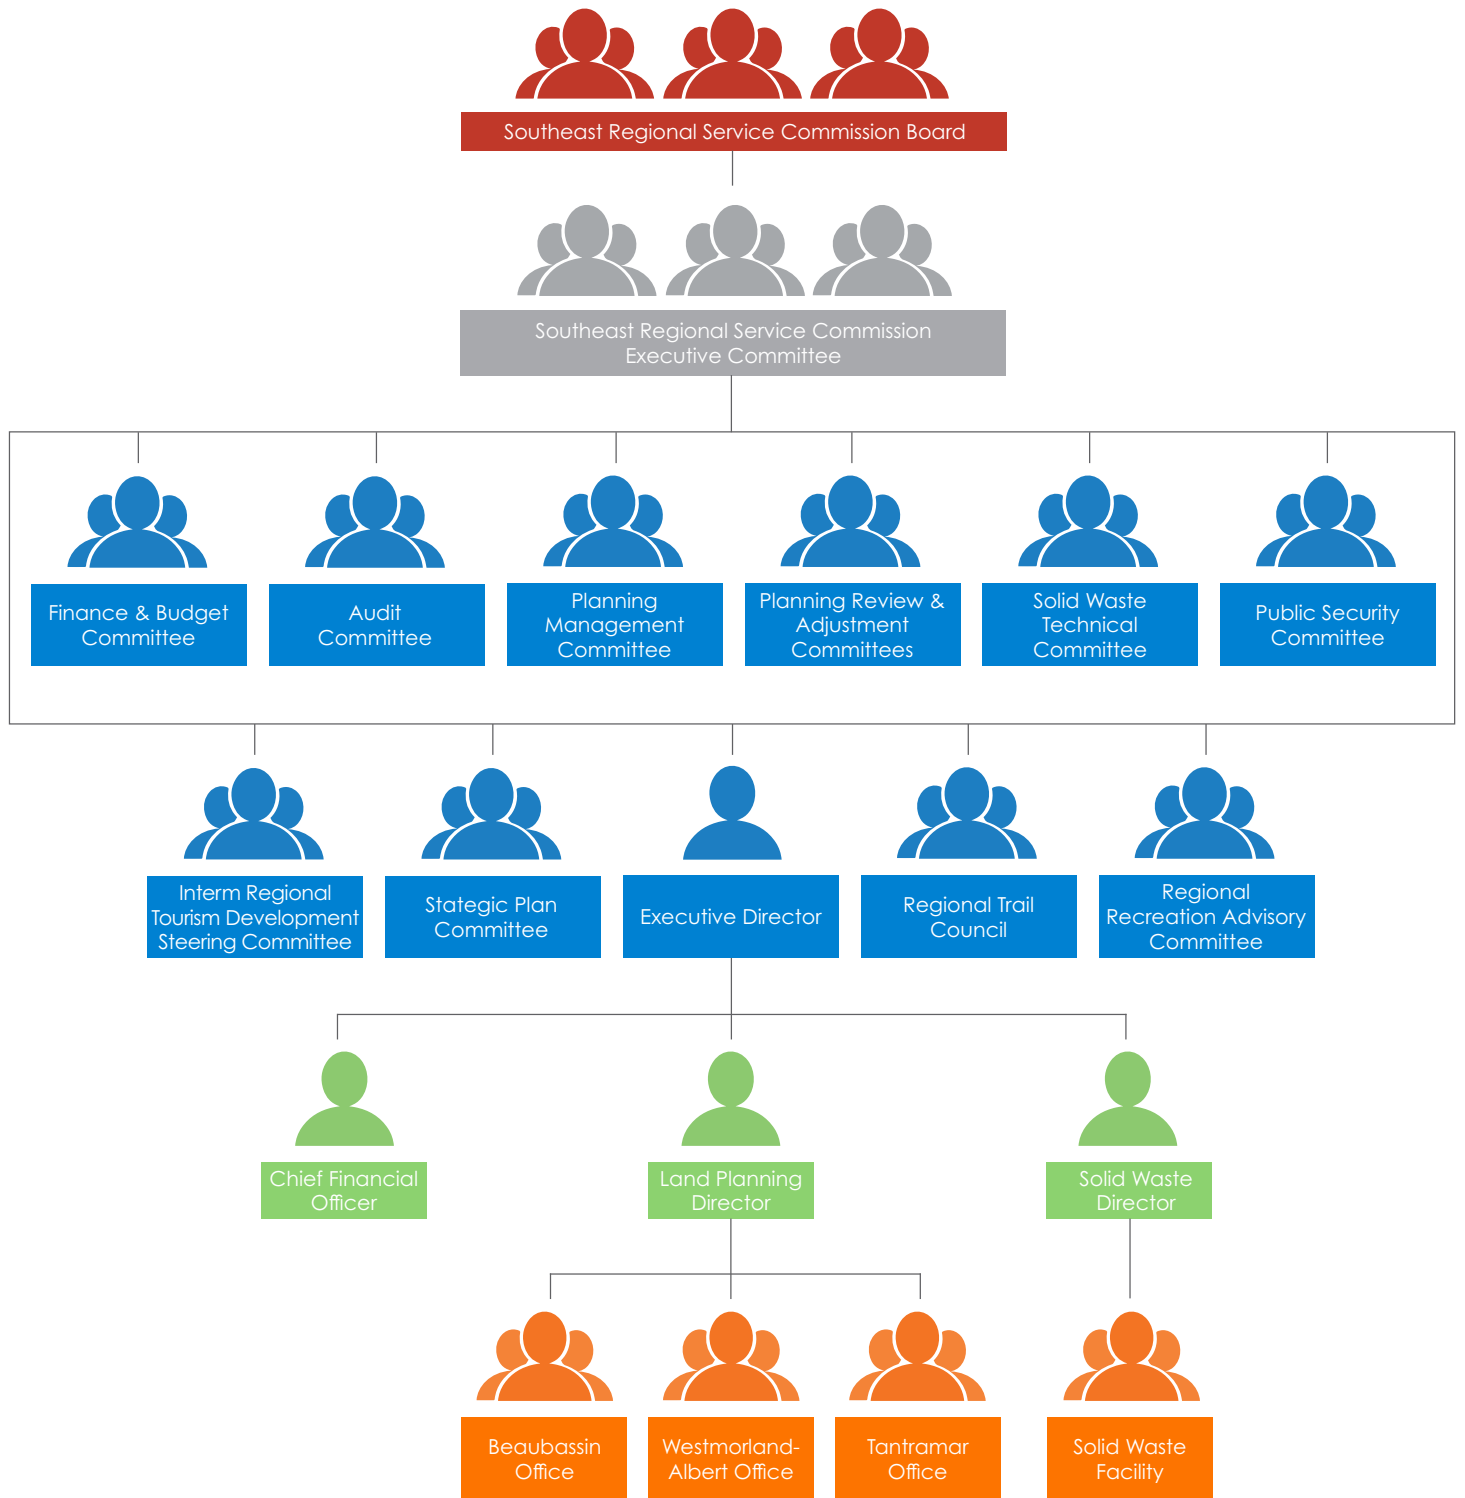

The Regional Service Commissions are governed by communities through a board of community representation which sets the direction and makes decisions for the overall Commission. This Board is responsible for establishing by-laws which govern the activities of the Board, and the operations of the Commission, including any administrative requirements.

The Southeast Regional Service Commission plays an important role in land planning use and solid waste removal in these areas. We help facilitate communities working together, sharing services and meeting common needs.

Communities receiving services from Southeast Regional Service Commission are:

Village of Alma	LSD of Coverdale
Beaubassin East Rural Community	LSD of Dorchester
Village of Cap-Pelé	LSD of Elgin Center
City of Dieppe*	LSD of Harvey
Village of Dorchester	LSD of Hillsborough
Village of Hillsborough	LSD of Hopewell
Village of Memramcook	LSD of Moncton
City of Moncton*	LSD of Murray Corner
Village of Petitcodiac	LSD of Parish of Elgin
Village of Port Elgin	LSD of Pointe-de-Bute
Village of Riverside-Albert	LSD of Pointe-du-Chêne
Town of Riverview	LSD of Sackville
Town of Sackville	LSD of Salisbury
Village of Salisbury	LSD of Scoudouc
Town of Shediac	LSD of Scoudouc Road
LSD of Alma	LSD of Shediac
LSD of Bayfield	LSD of Shediac Bridge-Shediac River
LSD of Baie Verte	LSD of Shediac Cape
LSD of Botsford	LSD of Westmorland
LSD of Cape Tormentine	

\* excluded from Southeast Regional Service Commission local land use services

Eco360, the Solid Waste Division of the SERSC, provides residential, institutional, commercial, and industrial waste management services to Westmorland and Albert Counties. These services are provided through the 3-Stream waste sorting program, a Material Recovery Facility (MRF), a Composting Facility, an engineered Sanitary Landfill with both leachate and landfill gas treatment, Household Hazardous Waste (HHW) on-site Depot, a Mobile Eco-Depot, Glass Depots and a Construction and Demolition (C&D) site. Eco360 also provides these services to the Kent RSC and RSC 8, and processes residential recycling streams from the Chaleur and Greater Miramichi RSCs.

Eco360 obtains advice, guidance and insight from the Solid Waste Municipal Advisory Committee. In 2021, the Committee was comprised of the following members:

---

**SOLID WASTE TECHNICAL COMMITTEE**

---

Ronald Boudreau - Chairman	SERSC Board Representative
Paul LeBlanc	SERSC Board Representative
David Knowles	City of Dieppe
Dwayne Acton	Town of Sackville
Eric Mallet	Village of Memramcook
Geoff Crossman	Town of Riverview
Alcide Richard	City of Moncton
Alexandre Binette	City of Moncton
Marc Cormier	Town of Shediac
Wally Morrisey	Village of Riverside-Albert

## COVID-19: HOW THE PANDEMIC AFFECTED ECO360 IN 2021

The COVID-19 pandemic had a lesser effect on our operations in 2021 but was still present. Even with the evolution of the pandemic in 2021, Eco360 did not have to suspend any operations. However, with the rise of the Omicron variant, staff were asked to take strict precautionary measures to ensure everyone's safety.

Eco360 continued to encourage residents to follow safety procedures while visiting the site or events and kept contact between employees and residents to a minimum while respecting the Province's safety protocols. Eco360 continued to monitor the pandemic developments, make necessary modifications to allow for proper separation and distancing in plant operations, secure PPE and followed a robust COVID-19 Operational Action Plan which provided the safest possible environment for our staff, customers, and visitors.

As we look back on the year, we take pride in all we achieved, and that we once again did so while keeping the safety of our staff and the public our highest priority.

## NEW AND ON-GOING PROJECTS IN 2021

Although the Covid Pandemic brought on many challenges, this did not stop us from working on new and ongoing projects which are designed to improve the services provided to taxpayers and help us protect the environment. New and ongoing projects for 2021 include:

- Leachate effluent pump station
- Leachate force main and gravity sewer cleaning
- Cell 17 construction
- Compost storage area
- Reuse Expo
- Glass recycling program

Figure 1: Construction of the leachate effluent pump station

## LEACHATE EFFLUENT PUMP STATION

A new 2100 mm diameter effluent pump station was installed in 2021 to replace the original station installed in 1993. The new station consists of two submersible 17 horsepower pumps designed for future leachate volumes generated. Control panel upgrades were completed under a 2020 aeration project to accommodate this new station and were programmed to control both stations as required by Eco360. The pump station moves the treated leachate along a 1800m force main where it discharges into an Eco360 gravity sewer, prior to reaching the City of Moncton wastewater system.

Due to material delivery delays, the December 2021 completion date was missed, and final commissioning occurred in January of 2022.

Figure 2:  
Completed leachate effluent pump station

## CELL 17 – CONSTRUCTION

2021 saw the construction of a new landfill cell. Earthwork was performed by Eco360 staff and specialty items were tendered out for contract. This was the first year that an approved change was made to the liner system. A 600 mm recompacted till liner used since 1992 was substituted with a Geosynthetic clay liner having a higher impermeability than the previous system. The Geosynthetic liner cost was offset by reducing the construction costs for the till liner, allowing additional airspace for waste, reduction in construction time, and generated additional excavated material that was used for final cover on closed landfill cells. Construction was completed without delays and with all Covid-19 protocols being implemented.

Figure 4: Geosynthetic liner

Figure 3: Cell 17 construction

## COMPOST STORAGE AREA

A granular compost storage area was constructed in 2021 by Eco360 staff. The area is 180 m x 40 m wide for storage of mature compost windrows. This location allows for future expansion for additional compost storage.

## REUSE EXPO

Eco360's Reuse Expo was launched for the first time in 2021 and is the first of its kind in the province. This is an event where residents and businesses can drop off reusable items to be sorted by Eco360 staff and local charitable organizations for reuse. The condition of each item is evaluated, and then it is sent to either be refurbished, reused, or, if it is not in suitable condition, recycled or landfilled.

Figure 5: Compost Storage Area

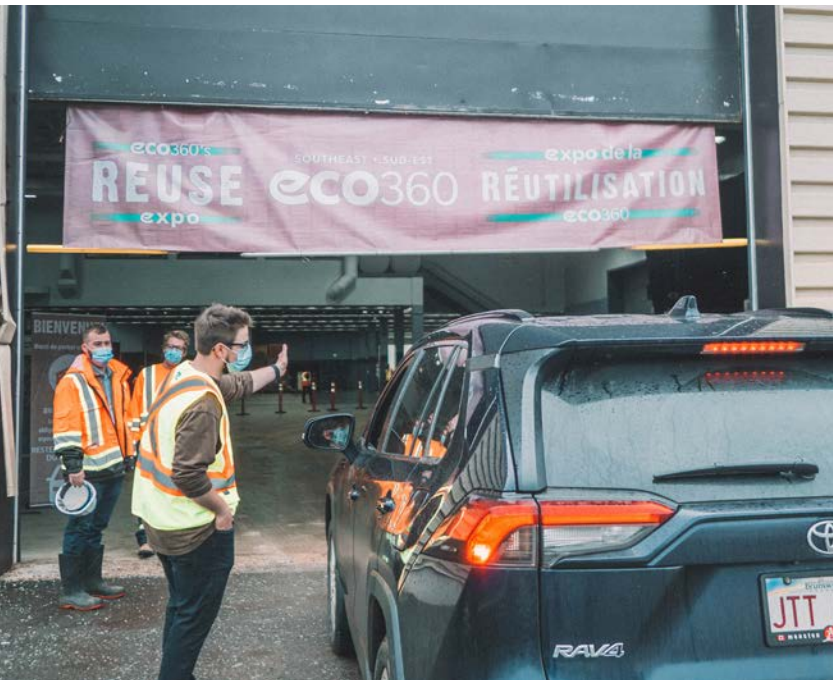

Figure 6: Reuse Expo event at the Moncton Coliseum

By offering this service at no cost, it encourages residents to bring their items to the Expo rather than directly to the landfill where they would pay a tipping fee. Once they arrive on-site, we hope to inspire them by having them see items being given a second life. Often, the public would love to donate gently used items but are either unsure of where they will be accepted, how to get them there, or what will be done with them.

Eco360's Reuse Expo has been a great success for the region with the diversion of over 30 metric tonnes of material from the landfill, creation of lasting partnerships with several local charities and community organizations, and participation from hundreds of residents. We look forward to continuing to hold the Expo twice per year for many years to come, watching the event grow, and increasing the amount of material diverted from our landfill for reuse.

## GLASS RECYCLING PROGRAM

Eco360 implemented a glass recycling program using depots in the region in 2021. This is the only non-beverage glass recycling program in New Brunswick and is made possible through a partnership with local recycler Rayan Environmental Solutions. Depots have been placed in 9 permanent locations throughout the region:

Eco360's Waste Management Facility	Sackville	Cap-Pelé
Dieppe	Memramcook	Moncton
Riverside-Albert	Riverview	Shediac

The first depots were in place in the Spring of 2021 and since then, Eco360 has collected a total of 26 metric tonnes of glass from the community depots. Including all glass collected, over 75 metric tonnes of glass was sent for recycling in 2021. This represents an increase in glass recovery by 96% since 2020. As awareness of the program and participation increases, we expect to see tonnage rise as well.

Figure 7: Eco360 Glass Recycling Program Bins

Figure 8: Eco360 Glass Recycling Program Filled Bin

## REOCCURRING IN 2021

The following sections provide an update on reoccurring events and a summary of activities and results for 2021 which include the Mobile Eco-Depot, 2021 revenues and tonnage, public education and awareness, recycling and compost, landfill gas to energy project and household hazardous waste program.

## MOBILE ECO-DEPOT

The Eco360 Mobile Eco-Depot program had another successful year in 2021 and was visited by 21,120 vehicles – a 39% increase from 2020 (15,222)! The increase can certainly be attributed in part to having to cancel several events in 2020 because of the pandemic; no events were cancelled in 2021. This program continues to receive much praise from all residents that take advantage of being able to drop off items **free of charge** that are not collected during weekly curbside pick-up. The program undoubtedly helps to reduce illegal dumping in Southeastern NB.

Figures 10 and 11 provide a summary of the material collected each year during mobile eco-depot events. Since the launch of the Mobile Eco-Depot program over 65,000 vehicles have visited our events and materials collected include:

- 15,600 tires,
- 360 tonnes of metal,
- 7 tonnes of ashes,
- 5.5 tonnes of glass,
- 4492 appliances,
- 1895 TV's,
- 99 tonnes of cardboard, and
- 612 tonnes of Household Hazardous Waste.

Figure 9: Mobile Eco-Depot Event in Dieppe, NB

### MOBILE ECO-DEPOT MATERIALS - 2021

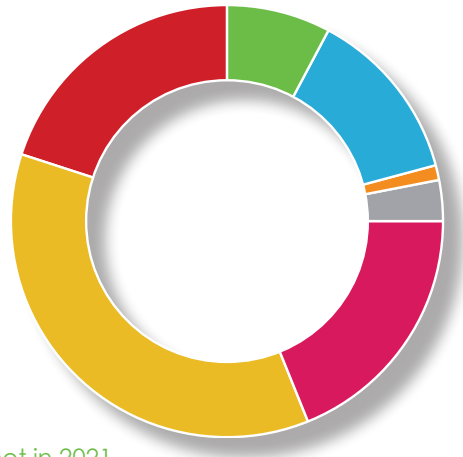

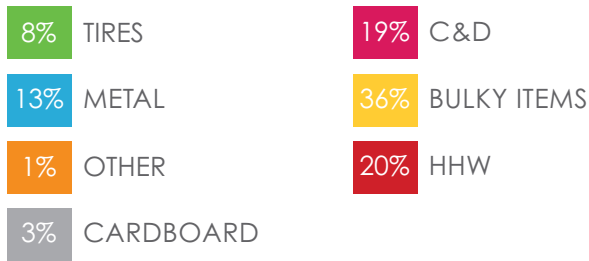

Figure 10: Breakdown of materials received at Mobile Eco-Depot in 2021

### MOBILE ECO-DEPOT MATERIALS COLLECTED

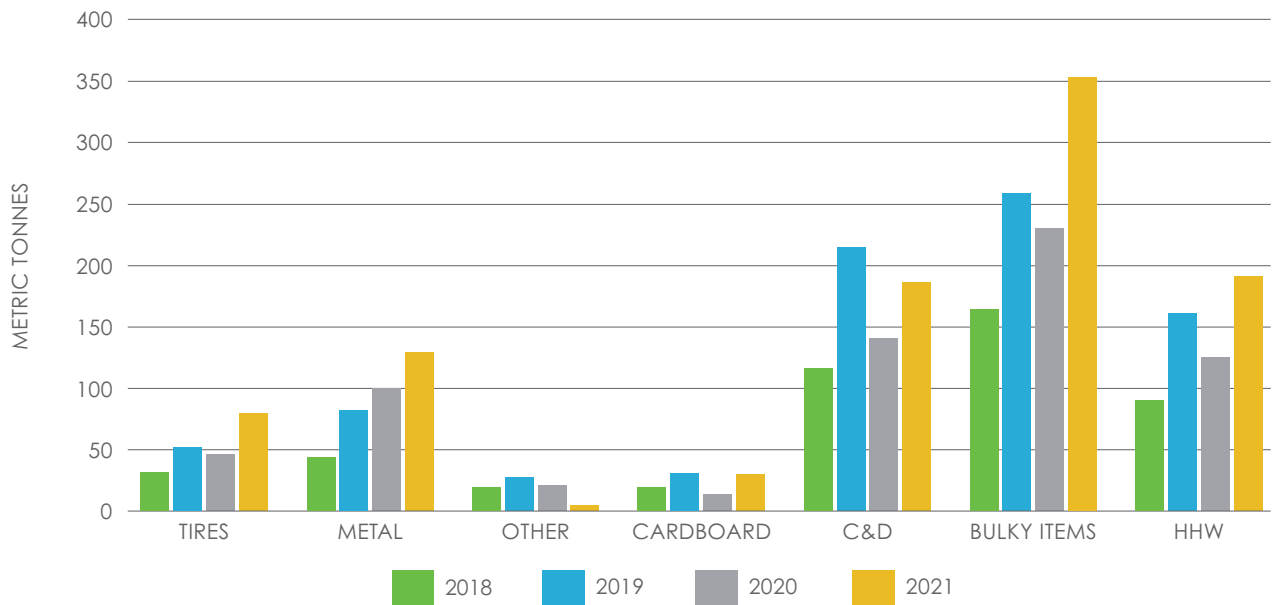

Figure 11: Tonnage of Materials Received at Mobile Eco-Depot

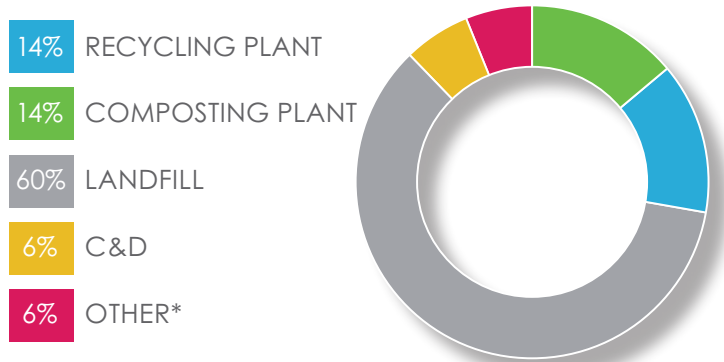

## 2021 REVENUES AND TONNAGE

In 2021, the total weight of waste received at the site was 169,523 metric tonnes, which is a 6% decrease from 2020 (179,862 tonnes). Eco360 received 46,596 tonnes of residential waste from Westmorland and Albert Counties which is a decrease of 11% over 2020 (52,484 tonnes). These decreases are likely a result of reduced impact of Covid-19 in 2021 and a return to more "normal" behaviours and operations.

Total revenue for solid waste services in 2021 was \$18,779,853 which is an increase of 13% from 2020 (\$16,665,622). This is derived from \$8,378,339 from ICI, \$292,072.80 from C&D, and \$2,129,864 from recyclables revenue and the remainder from Kent, RSC8, Municipalities and other.

### TONNAGE RECEIVED

\* Other includes tires, wood, public drop-off, and metals.

Figure 12: Breakdown of materials diverted from landfill in 2021

## PUBLIC EDUCATION & AWARENESS

With the ongoing Covid-19 restrictions and requirements in place, Eco360 has focused direct interaction and outreach on virtual presentations. Virtual presentations have been very popular with schools, and we have been able to host a small number of tours with specialized groups following our Covid-19 protocols. Even with these limitations, outreach has been very successful. In 2021, Eco360 did 53 presentations and 4 tours representing contact with about 1500 people in the region.

Eco360 increased our online presence in 2021 with social media advertising campaigns using Facebook and Instagram. This included campaigns for the Spring and Fall Reuse Expos, the new Glass Recycling Program, a Holiday campaign, and various educational and

awareness posts. Across all campaigns in 2021, results were: reached over 286,900, more than 1,493,000 impressions, 1784 post reactions, 13,120 clicks, and 75 comments on our posts.

Eco360 also had an extensive curbside waste audits program in the later summer and early fall of 2021. The audit team evaluated curbside residential waste sorting quality on select routes in all 15 of the Region's municipalities. A total of 3,750 addresses were audited in the region. The results show that 97% of households in Southeastern NB are making an effort to properly sort their residential waste into the three streams: Organics, Recyclables, and Garbage. Eco360 will continue these types of audits to gain valuable insight for future education and awareness campaigns.

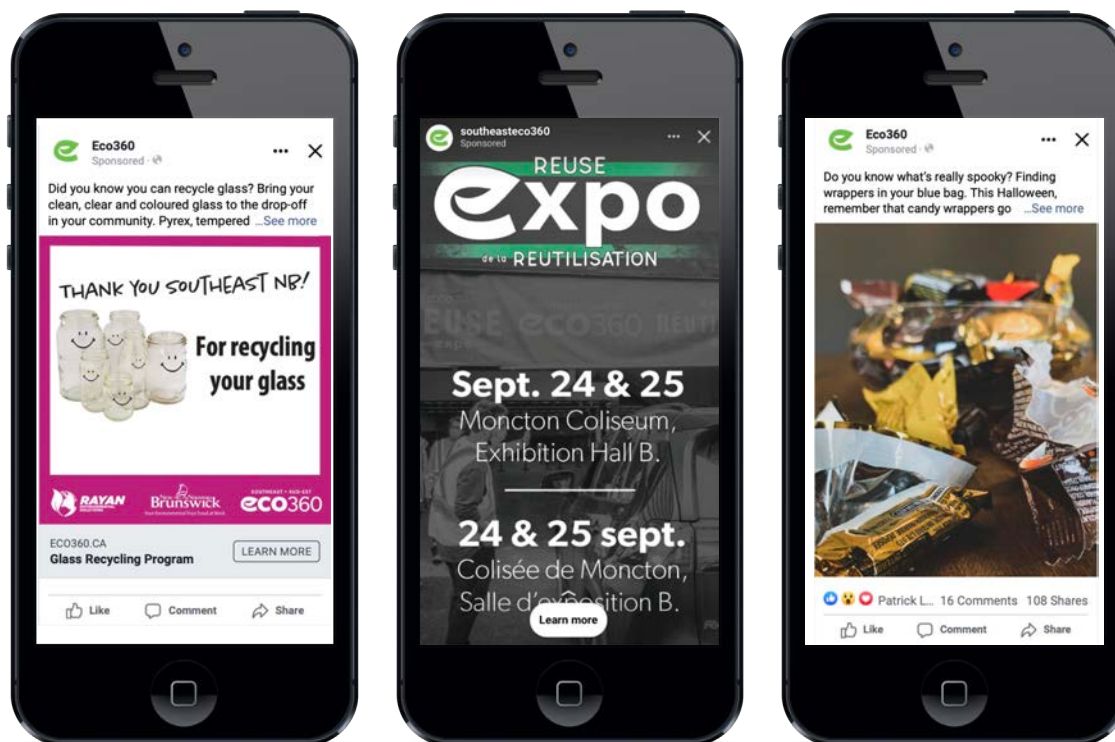

Figure 13: Eco360 social media post and ad examples

## RECYCLING & COMPOST

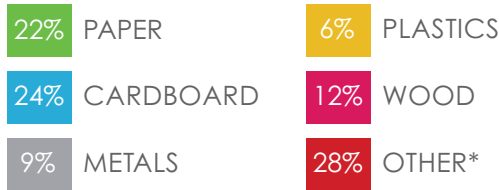

In 2021, the Material Recovery Facility achieved a record-breaking year in both production and revenues despite the challenges brought forward by the on-going COVID-19 pandemic. Our strict covid screening and testing protocols mitigated several outbreaks on-site. While this resulted in staff occasionally missing work while in isolation, we remained operational and achieved great results.

The Commission saw a 96% increase in recyclables revenues from 2020. Total revenue from recyclables in 2021 was \$2,129,864 (\$1,088,699 in 2020). This increase is due to

several factors, including higher pricing and increased recovery in all recyclable categories.

The total tonnage of recyclable materials recovered increased from 15,747 tonnes in 2020 to 17,863.3 tonnes in 2021 (13%). This is due to additional ICI participation in recycling programs, by continuing to process mixed recyclables from the Chaleur and Miramichi RSCs, as well as modifications to our plant operations including a renewed emphasis on preventative maintenance, new cardboard separator and optimization of staff utilization.

### RECYCLABLES PRODUCTION

\* Other includes Glass, Electronics, HHW, Aseptic Containers, Tires, and Shingles

Figure 14: Breakdown of diverted recyclable materials in 2021

## DIVERTED MATERIALS

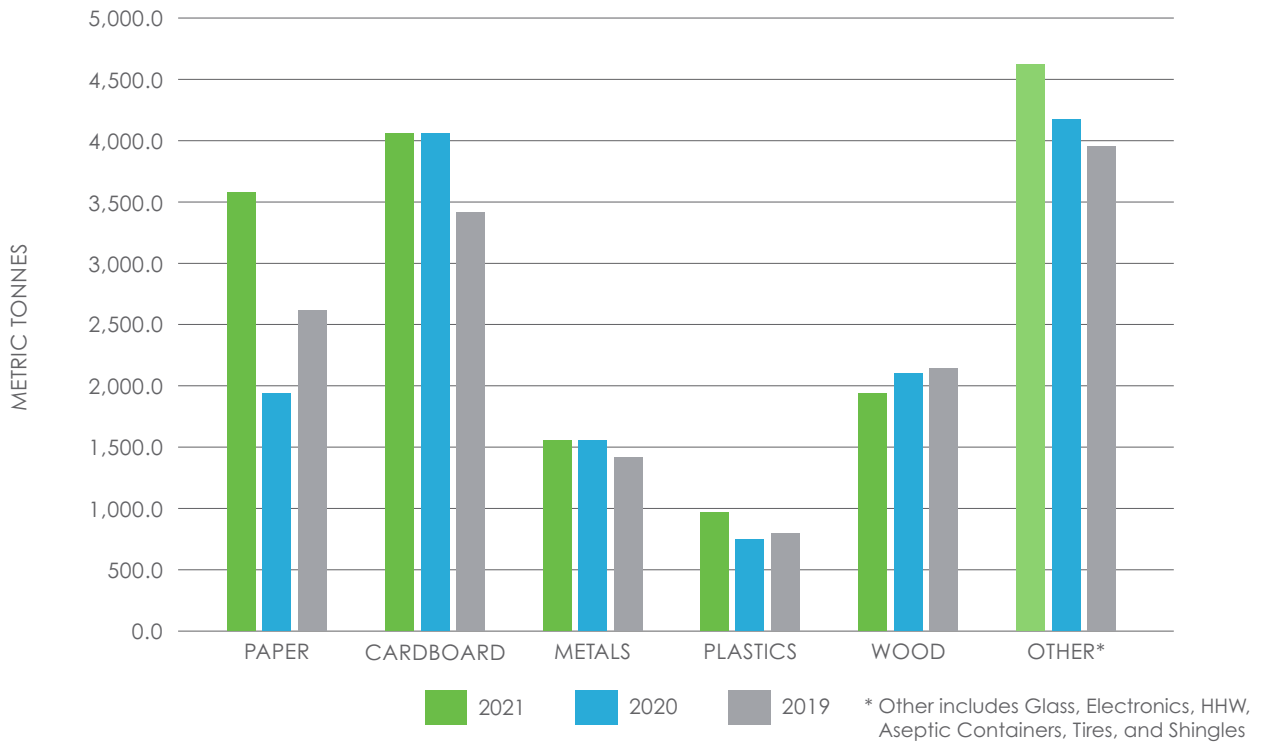

Figure 15: 2019 - 2021 Yearly Comparison of Recyclable Totals

## COMPOST

2021 was a good year for our composting operations with sales of Category A type compost to the market for a total revenue of almost \$17,000.

## LANDFILL GAS-TO-ENERGY

2021 was a productive year for the 1.0MW landfill gas to energy facility with an uptime connected to the utility grid of 95%. Increased lead times for certain replacement parts and

having to operate at reduced loads at times resulted in a 7% lower output than compared to 2020.

	2020	2021	Total Since Start-Up*
<b>Power Generation (kWh)</b>			
<i>Exported to NB Power Utility Grid</i>	7,824,600	7,289,112	32,437,776
<b>Carbon Footprint Offset [MTCO<sub>2</sub>e]</b>			
<i>From destruction of methane gas</i>	45,167	42,132	190,570
<b>NB Houses Powered for One Year</b>			
<i>Based on average NB home energy consumption</i>	487	453	2,017
<b>Revenues</b>	<b>\$ 860,862.49</b>	<b>\$ 812,865.22</b>	<b>\$ 3,535,618</b>

\* Operation started in late September of 2017

## HOUSEHOLD HAZARDOUS WASTE (HHW)

Eco360 provides free collection and recycling or safe disposal of household hazardous waste for residents of the region. This service is provided through a permanent On-Site HHW Depot located at the Solid Waste Facility open during regular business hours, several battery depots

throughout the region, and a Mobile HHW Unit as part of the Mobile Eco-Depot program. The permanent depot received waste from 15,333 vehicles in 2021 while the Mobile HHW Unit was visited by 18,390 vehicles.

## NEW HOUSEHOLD HAZARDOUS WASTE DEPOT

After approximately 25 years of operation, our old Household Hazardous Waste Depot has reached the end of its life cycle. As the popularity of diverting hazardous waste from landfill has grown, we have seen our hours of operation go from 10 hrs. per week to 50 hrs. per week. The numbers of vehicles served has increase from 2,000 in 2001 to over 15,000 in 2021. Our small building no longer meets the needs of the increase in demand from residents and staff requirements.

A consulting firm was contracted to create a conceptual design that will allow for safe sorting and storage of all household hazardous waste and act as a control hub for our new public drop-off area. It will include spill containment, emergency shower and eyewash, gas detection, ventilation, washrooms, heat, lighting and a drive thru canopy. These are all improvements over the existing depot.

Construction is anticipated to begin in 2022.

## HOUSEHOLD HAZARDOUS WASTE

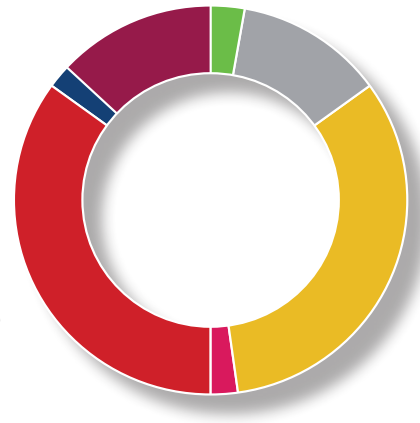

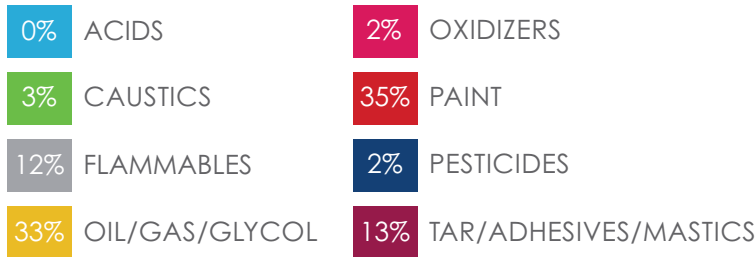

Figure 16: Breakdown of HHW collected in 2021

## HOUSEHOLD HAZARDOUS WASTE BREAKDOWN

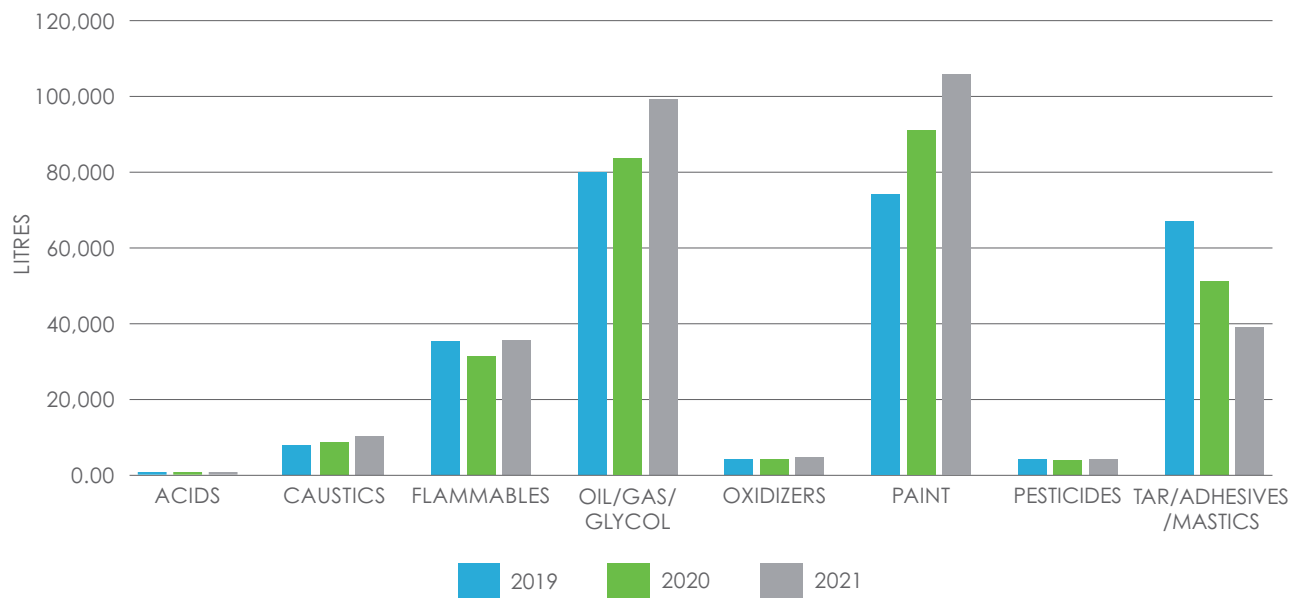

Figure 17: 2019 – 2021 Yearly Comparison off HHW Totals

The following table is a list of materials received as part of Eco360's HHW Program (Mobile Unit and On Site Depot).

MATERIAL	2019	2020	2021
Aerosols	38,420 cans	40,460 cans	46,070 cans
Batteries (Household)	1,224,000 batteries	1,488,000 batteries	1,500,000 batteries
Batteries (Car)	17,120 Kg	17,770 Kg	20,150 Kg
Propane Tanks	13,741 tanks	14,832 tanks	14,506 tanks
CFL Bulbs	18,392 bulbs	18,293 bulbs	21,508 bulbs
Fluorescent Light Tubes	52,615 bulbs	46,293 bulbs	92,564 bulbs
Sharps/Pharmaceutical Waste	510 Kg	960 kg	1,160 kg
<b>Total Diverted from Landfill</b>	<b>250,900 Kg</b>	<b>244,520 Kg</b>	<b>287,801 Kg</b>

## FINANCIAL INFORMATION

The following table shows the various tipping fees on-site (prices are per metric tonne unless otherwise indicated). Considering the

added strain of the Covid-19 pandemic, the Commission decided to hold most tipping fees constant for 2021.

SERVICE	2019	2020	2021
Landfill	\$109.00	\$116.00	\$116.00
Mixed C&D	\$50.00	\$50.00	\$50.00
Separated C&D	\$15.00	\$15.00	\$15.00
Grubbing	\$10.00	\$10.00	\$50.00
Electronic Waste	Free for EPRA material \$109.00 for non-EPRA material	Free for EPRA material \$116.00 for non-EPRA material	Free for EPRA material \$116.00 for non-EPRA material
Sorted Recyclables & Organics	\$75.00	\$65.00	\$60.00
Source Separated Organics	\$30.00	\$30.00	\$30.00
Residential Waste (per household)	\$57.00	\$57.00	\$56.00

# MOSQUITO Control Program

## INTRODUCTION TO THE MCD

The Mosquito Control Division (MCD) exists to monitor and control the mosquito populations of the Tri-Community, primarily targeting the larval stage of mosquitoes by applying biological larvicide *Bacillus thuringiensis subspecies israelensis (Bti)* to standing water in marsh and various other site classes. The 2021 MCD Field Season operated with a total of nine staff members (one Field Supervisor and eight Field Technicians) and ran from May 3 to September 3, with late work continuing until October 3 at a reduced staffing level. This year marked the first field season under new management, in which the program transitioned from the Greater Moncton Pest Control Commission (GMPCC) to the Mosquito Control Division (MCD) of the Southeast Regional Service Commission (SERSC). This ongoing transition has proved to be successful, and has allowed the MCD to expand operations, standardize and digitize data collection, and greatly improve innovation, safety, and efficiency.

## MCD MONITORING & TREATMENT AREAS

As seen in Fig. 1, the MCD's 2021 active site list totaled an approximate 10,887 km<sup>2</sup> of monitoring and treatment area, which is comprised of marsh, small site, park/trail, retention pond, school and highway sites. Although mosquitoes are liable to breed in any standing water source, the marsh areas bordering the Petitcodiac River comprise the vast majority of this total due to their sheer abundance of mosquito breeding habitat. Mosquito larvae thrive in the stagnant waters of marsh ecosystems, necessitating the MCD's focus on marsh sites for monitoring and treatment.

In addition to monitoring for mosquitoes at the larval stage, the MCD employs an adult trapping program for the purposes of monitoring adult

mosquito populations. Trap numbers serve as a metric for treatment efficiency, identifying areas where larvicide application efforts should be concentrated and allowing for cross-year comparison of population abundance.

Over the 2021 season, a total of 18,676 kg of larvicide were applied to the MCD's treatment areas, equating to a 207% increase in application amount from 2020. This large increase in larvicide use can be largely attributed to the season's unusually high precipitation, the average of which doubled that of 2020 for the same period. Mosquito habitat availability and consequently, population abundance flourished as a result, illustrated by 2021's average adult trapping count increase of 416% from the previous year.

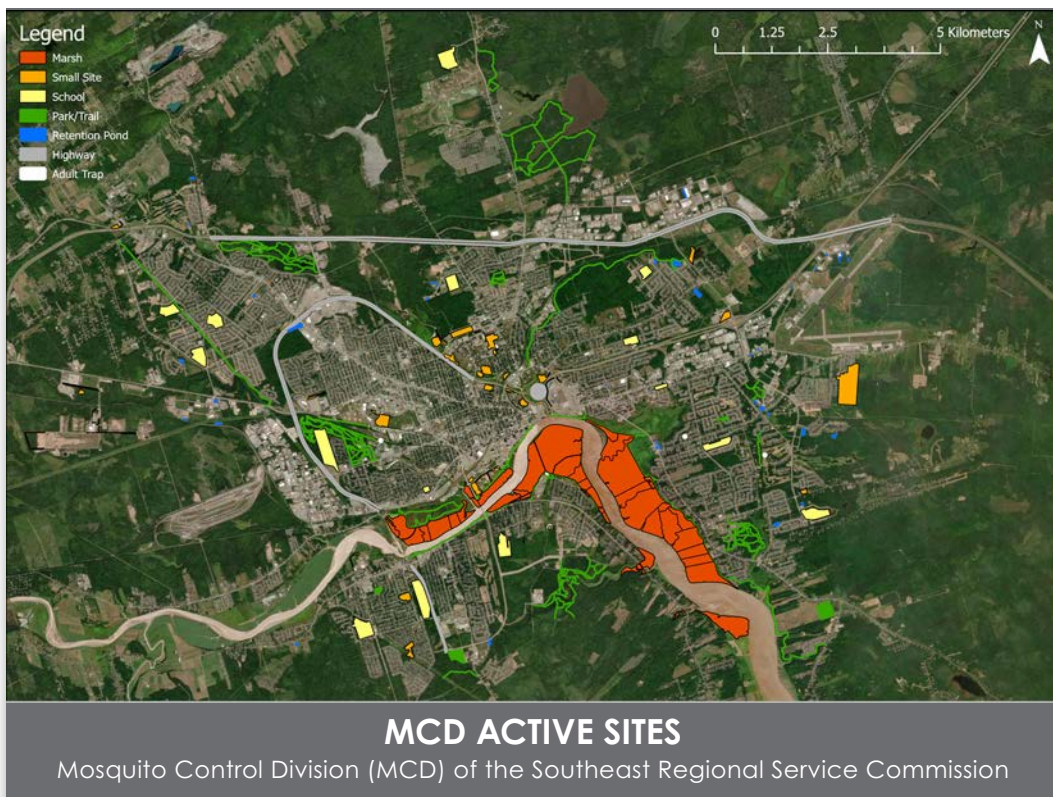

Figure 1: Map of the MCD's active sites for 2021 symbolized by site class

## MCD LARVICIDE APPLICATION EQUIPMENT

As marsh sites comprise over 50% of our monitoring and treatment area, the MCD relies heavily on our fleet of all-terrain Argos. Each of the MCD's Argos is equipped with a larvicide hopper and rotating spinner, which disperse larvicide granules along the drive path. Argos are capable of traversing

marsh terrain and are a necessary asset for controlling mosquito populations in the Tri-Community. For the treatment of smaller, non-marsh sites, the MCD owns backpack sprayers and hand sprayers, utilizing our two-passenger Gator trail vehicle or mountain bikes for site transport.

## MCD DATA COLLECTION & MOSQUITO TREND ANALYSIS

In 2021 the MCD transitioned to digital data collection and purchased five pH/EC/TDS/temperature testers to expand water analytical data collection. As seen in Fig.2 and Fig.3, these improvements enabled significant trend analysis of mosquito population dynamics, in which larval counts and adult trapping numbers were correlated

with environmental parameters to identify emergence patterns. These trendlines suggest a 2-4 week delay between spikes in larval counts and adult counts, and suggest a significant correlation between spikes in precipitation and temperature, and spikes in larval abundance.

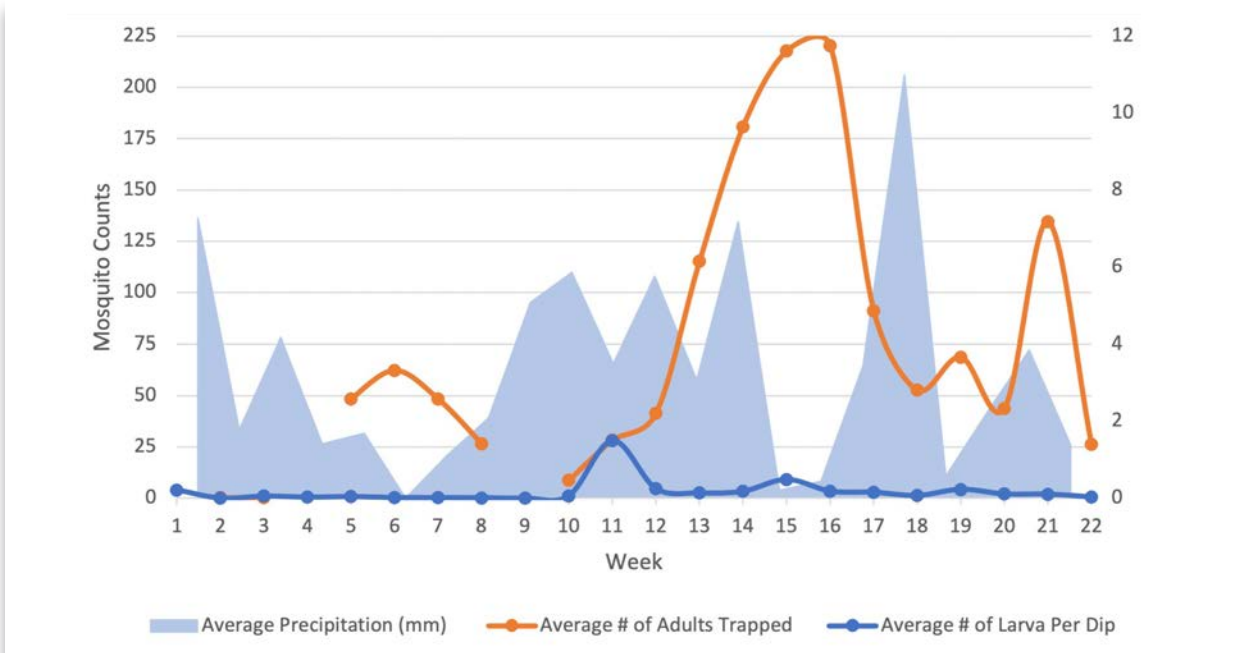

Figure 2 : Average number of adult mosquitoes trapped at the MCD's six consistent trapping locations and average number of larvae per dip across all sites monitored by the MCD over the 2021 season and 2021 late season correlated to average weekly precipitations. Traps were not set on weeks 4 and 9. Data where traps malfunctioned were not included. Climatic data sourced from Environment Canada.

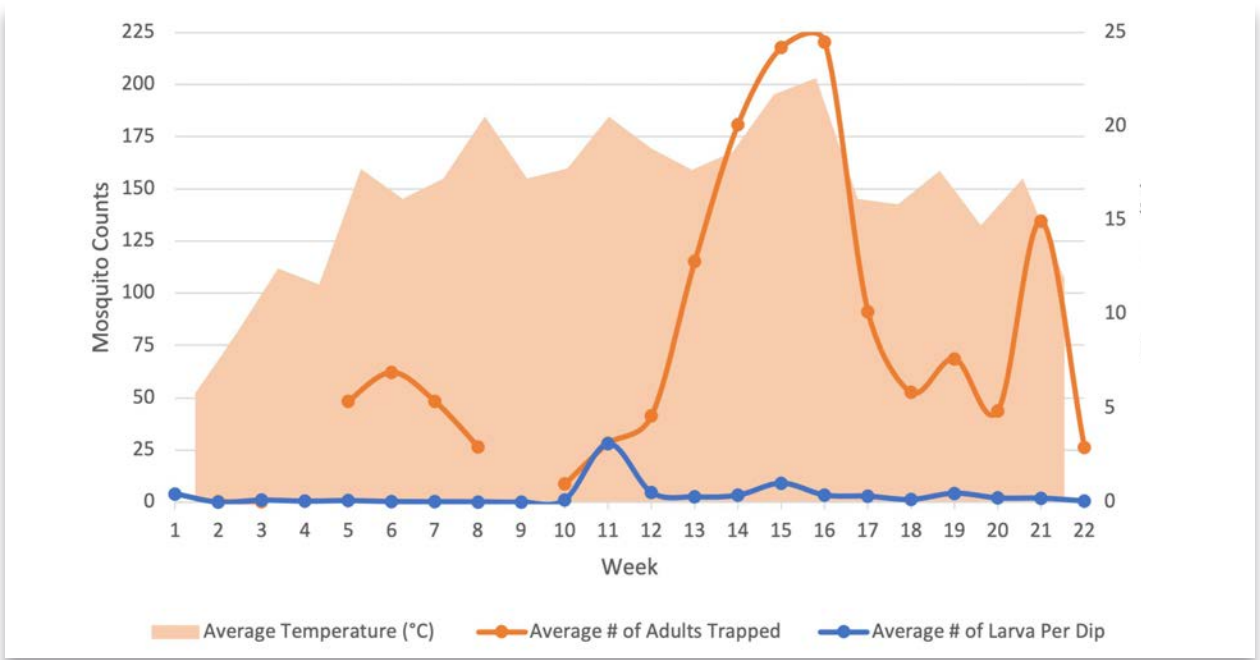

Figure 3: Average number of adult mosquitoes trapped at the MCD's six consistent trapping locations and average number of larvae per dip across all sites monitored by the MCD over the 2021 season and 2021 late season correlated to average weekly temperatures. Traps were not set on weeks 4 and 9. Data where traps malfunctioned were not included. Climatic data sourced from Environment Canada.

## CONCLUSION

In conclusion, the 2021 regular and late seasons were successful in both monitoring and controlling the mosquito population of the Tri-Community area. Digitized data collection combined with the late season extension through September allowed for an in-depth analysis of Tri-Community mosquito populations and additional treatment of the marsh areas.

In 2021, the planning team worked with consultants to brand the division for all its attributes and create a better understanding of our different roles serving our partners. While our goal was simple in essence, to better portray the valuable services we deliver, communicating the messages of complex laws and procedures for a wide audience was a significant endeavor. This work resulted in brand guidelines and a new name. Plan360 a division of the Southeast Regional Service Commission was chosen to help us communicate our message and better identify our services to the communities we serve.

Our team worked through the challenges of the pandemic to assure service delivery of a record year. 2021 has been well documented in the news for the massive construction boom in New Brunswick and particularly in southeast, some of it which is attributed to outward Canadian immigration of Canada's major urban centers. The new years headlines showed communities with more than 10% tax growth was common in our area. This has been the silver lining to many of our communities that have grappled with the challenges of Covid.

The record year meant an increased workload on staff, and we implemented several changes to our workflows to assure the processing of all building and development services in a timely manner for the public. We introduced some changes that could be done while servicing record permit numbers such as making further improvements to our website and existing database software. We also created a staff committee that addressed the issues beyond fixing our old database software and issued a contract to modernise our database. This initiative benefits from provincial funding to address the way we do business from a distance post pandemic.

Please take note that the local permit statistics from Moncton and Dieppe were provided by their respected departments for inclusion in this report.

## PLANNING REVIEW & ADJUSTMENT COMMITTEES

The *Community Planning Act* provides several planning and development tools which require approvals by a planning advisory committee. As well, before enacting amendments to planning and development by-laws and regulations, the Act requires the views of the committee to be sought before implementing changes. Within the southeast region, the board has created two Planning Review and Adjustment Committees: the Southeast Planning Review and Adjustment Committee to oversee the entire southeast region (excluding Dieppe, Moncton and Riverview who operate their own Planning Advisory Committees) and the Shediac Planning Review and Adjustment Committee which oversees the Town of Shediac.

The Planning Review and Adjustment Committees and the Planning Advisory Committees in the Southeast region meet monthly. All committees can hold special meetings if there are time sensitive matters that must be dealt with between meetings.

Southeast Committee members are appointed as at-large members and therefore do not represent the specific community in which they reside. The criteria for being a member consists of the member must reside within a community receiving local planning services, and have a basic knowledge of planning, local government functions and/or volunteer committees. All attempts are made to seek a diversity of skills.

Committee member attendance is strong, with members averaging two or fewer missed meetings over the calendar year. Full membership was maintained on the Southeast PRAC in 2021. Committee members Stanley Dixon, Linda Estabrooks, Heather Keith and Randy Trenholm were all renewed as members for an additional 4 year term. The Shediac PRAC welcomed new

members Patricia Bourque-Chevarie and Mike O'Brien to the Committee following the resignation of Denis Arsenault and Giles Brine in 2021. Thanks is extended to Denis and Giles for their involvement in the Committee. The Shediac PRAC renewed Andrew Bell, Kim Murphy and Paul Pourier's membership on the Committee for a 4 year term.

The Southeast Regional Service Commission staff have been working with the Town of Riverview PAC for the past year. Long term members David Campbell (former Chair) and Bob Riley resigned in 2021. Thanks is extended to these members for their many years of involvement on the committee. John Trainor and Debby Warren were welcomed as new committee members in 2021 to replace the two vacancies.

The committees have had to continue to hold many of their meetings in a virtual forum due to the ongoing Covid pandemic. Committee members have adapted well to changing between in-person and virtual meetings and did not need to cancel any meetings during the year due to unexpected changes in provincial restrictions. All committee members should be commended for their commitment to fulfill their roles and responsibilities, ensuring the public was included in the decision-making process and their overall willingness to embrace the changes between in-person and virtual meetings over the year.

Staff continue to monitor and compile statistics on the planning advisory committees and look toward improving efficiencies with committee operations. The Moncton Committee is monitored by the City of Moncton Urban Planning Department. The Dieppe Committee is monitored by the City of Dieppe Planning and Development Department.

## REGIONAL INITIATIVES

### REGIONAL TRAILS

Our regional trails continued to serve residents and visitors well in 2021. While indoor recreation facilities and activities were constrained during the pandemic, trails offered a refuge for those seeking to recreate out of doors and engage with nature. Increasing demand for trails has spurred significant developments and investments across the southeast that will see continued improvements to the regions trail offer in 2022 and beyond.

Plan360's continued to lead the planning and development of the Shore-Line Trail, a proposed 170 km hiking and cycling trail which will connect from Alma to Cap-Pele. Progress was made on several segments of this trail in 2021. In the fall, a 2 km section of trail was built to connect Hopewell Rocks Provincial Park and there are plans to extend that route towards the Shepody Trail over the next 2 years. Portions of the Shepody Trail near Riverside Albert received critical repairs overseen by Plan360. All this work was made possible with funding from New Brunswick Department of Tourism Heritage and Culture.

Plan360 also supported important trail investments made by municipalities and grass roots trail builders. Cap-Pele, Shediac, Dieppe

and Beaubassin-East all committed to moving forward with plans that will contribute to the Shore-Line Trail route. The town of Riverview established a successful community trail building program that is resulting in an expanding single track trail network in their municipal nature park. Grass roots community groups focused on trail building in Elgin, Hillsborough, Shediac and Memramcook made incredible strides in developing and formalizing single track trails over the past year as well. Plan360 plays an important role in facilitating and supporting the important work that volunteer trail builders do across the region.

The momentum that's been building for the past for years shows no signs of slowing down. Enthusiasm for the Shore-Line Trail has led to important financial commitments from many municipalities, and Plan360 was able to secure over \$950 thousand dollars to build trail in unincorporated areas over the next 2 years through the provincial gas tax fund. The Shore-Line Trail also became part of the Trans Canada Trail network in 2021 which will provide opportunities to access additional funding going forward in addition to national and international recognition and visibility.

## ADAPTING TO A CHANGING CLIMATE

2021 continued to be an active year on advancing climate change and flood adaptation through local and regional initiatives, and our involvement in several provincial and Canada-wide projects. Below are some highlights of the year.

Plan360 coordinated the second phase of the Rural Tantramar Climate Change Adaption Plan (CCAP) through funding from the Environmental Trust Fund. The purpose of the second phase was to identify actions based on a previously completed climate vulnerability assessment and input from local stakeholders. The actions relate to flooding, infrastructure, natural environment, emergency measures, health and natural resources. Plan360 also supported CCAPs in Hillsborough, Alma and Memramcook by providing climate related mapping produced from previous regional initiatives.

With funding and participation by Natural Resources Canada, Municipal Natural Assets Initiative and the NB Environmental Trust Fund, Plan360 coordinated a pilot project in Pointe-du-Chêne. The goal of this project was to develop and test a practical tool to evaluate nature-

based solutions to reduce coastal flooding and erosion. It was found that with climate change projections factored in, nature-based solutions such as dune improvements and beach nourishment can reduce erosion and flood damages for smaller, more frequent storm events. This tool has the potential to be used in community planning to explore the costs and benefits of various coastal adaptation solutions. Learn more at: [plan360.ca/initiatives/natural-assets](https://plan360.ca/initiatives/natural-assets).

Plan360 staff have also worked at the provincial and federal level to help advance climate and flood adaptation. This included being involved on the steering committee of the New Brunswick Climate Change Adaptation Collaborative and on a project with the Canadian Standards Association and National Research Council on Nature-Based Solutions for Coastal and Riverine Flood and Erosion Risk Management. Our staff were also consulted by the Federation of Canadian Municipalities, Natural Resources Canada, CLIMAtlantic and the Municipal Natural Assets Initiative on ways to incorporate climate and flood adaptation and mitigation best-practices into new program offerings.

## LAND PLANNING GOALS FOR 2022

Local government reform in NB is a major endeavor that will have an impact on generations to come. The white paper has outlined the pillars of reform and the modernising of land use planning legislation in the province is one of them. To assist in the transition to new community boundaries, our mapping team is preparing maps and information to understand the new territories. By being proactive, these maps will also expediate the development of new community plans in the coming years.

The planning team is looking forward to the provincial adoption of the Westmorland Albert rural plan as this will bring zoning everywhere in Southeast. We will be the first region in the province with full land use coverage. While no other official plan will be under way before the municipal elections, we will complete our Tantramar climate change plan.

We are getting ready for another busy year as we expect that the construction boom will not be slowing down, having numerous applications underway for this calendar year. We will also continue building the shoreline trail this year with recent provincial funding. A lot of work will be undertaken to update all census information within our region for our partners whose boundaries will be changing legally on January 1st, 2023. This information will also be useful for the annual plan next year as we realise the changes in our region over the past 5 years.

# FINANCE SERVICES

The Finance Department is responsible for the proper management of the financial resources of the SERSC in accordance with the *Regional Service Delivery Act*, the *Procurement Act* and *Regulation*, the standards of CPA Canada and other provincial and federal acts and regulations.

## 2021 FINANCIAL RESULTS

CORPORATE SERVICES	Surplus	\$ 0
CORPORATE & REGIONAL SERVICES	Surplus	\$ 23,108
LOCAL PLANNING SERVICES (PLAN360)	Surplus	\$ 192,650
SOLID WASTE SERVICES (ECO360)	Surplus	\$ 1,410,471
ELECTRICITY GENERATION SERVICES	Deficit	\$ (43,562)
EMERGENCY MEASURES SERVICES	Surplus	\$ 0
DANGEROUS & UNSIGHTLY PREMISES SERVICES	Surplus	\$ 0
WA TRANSP0	Surplus	\$ 0
MOSQUITO CONTROL PROGRAM	Surplus	\$ 51,292

2021 proved to be a very busy year for the Southeast Regional Service Commission's Finance Department.

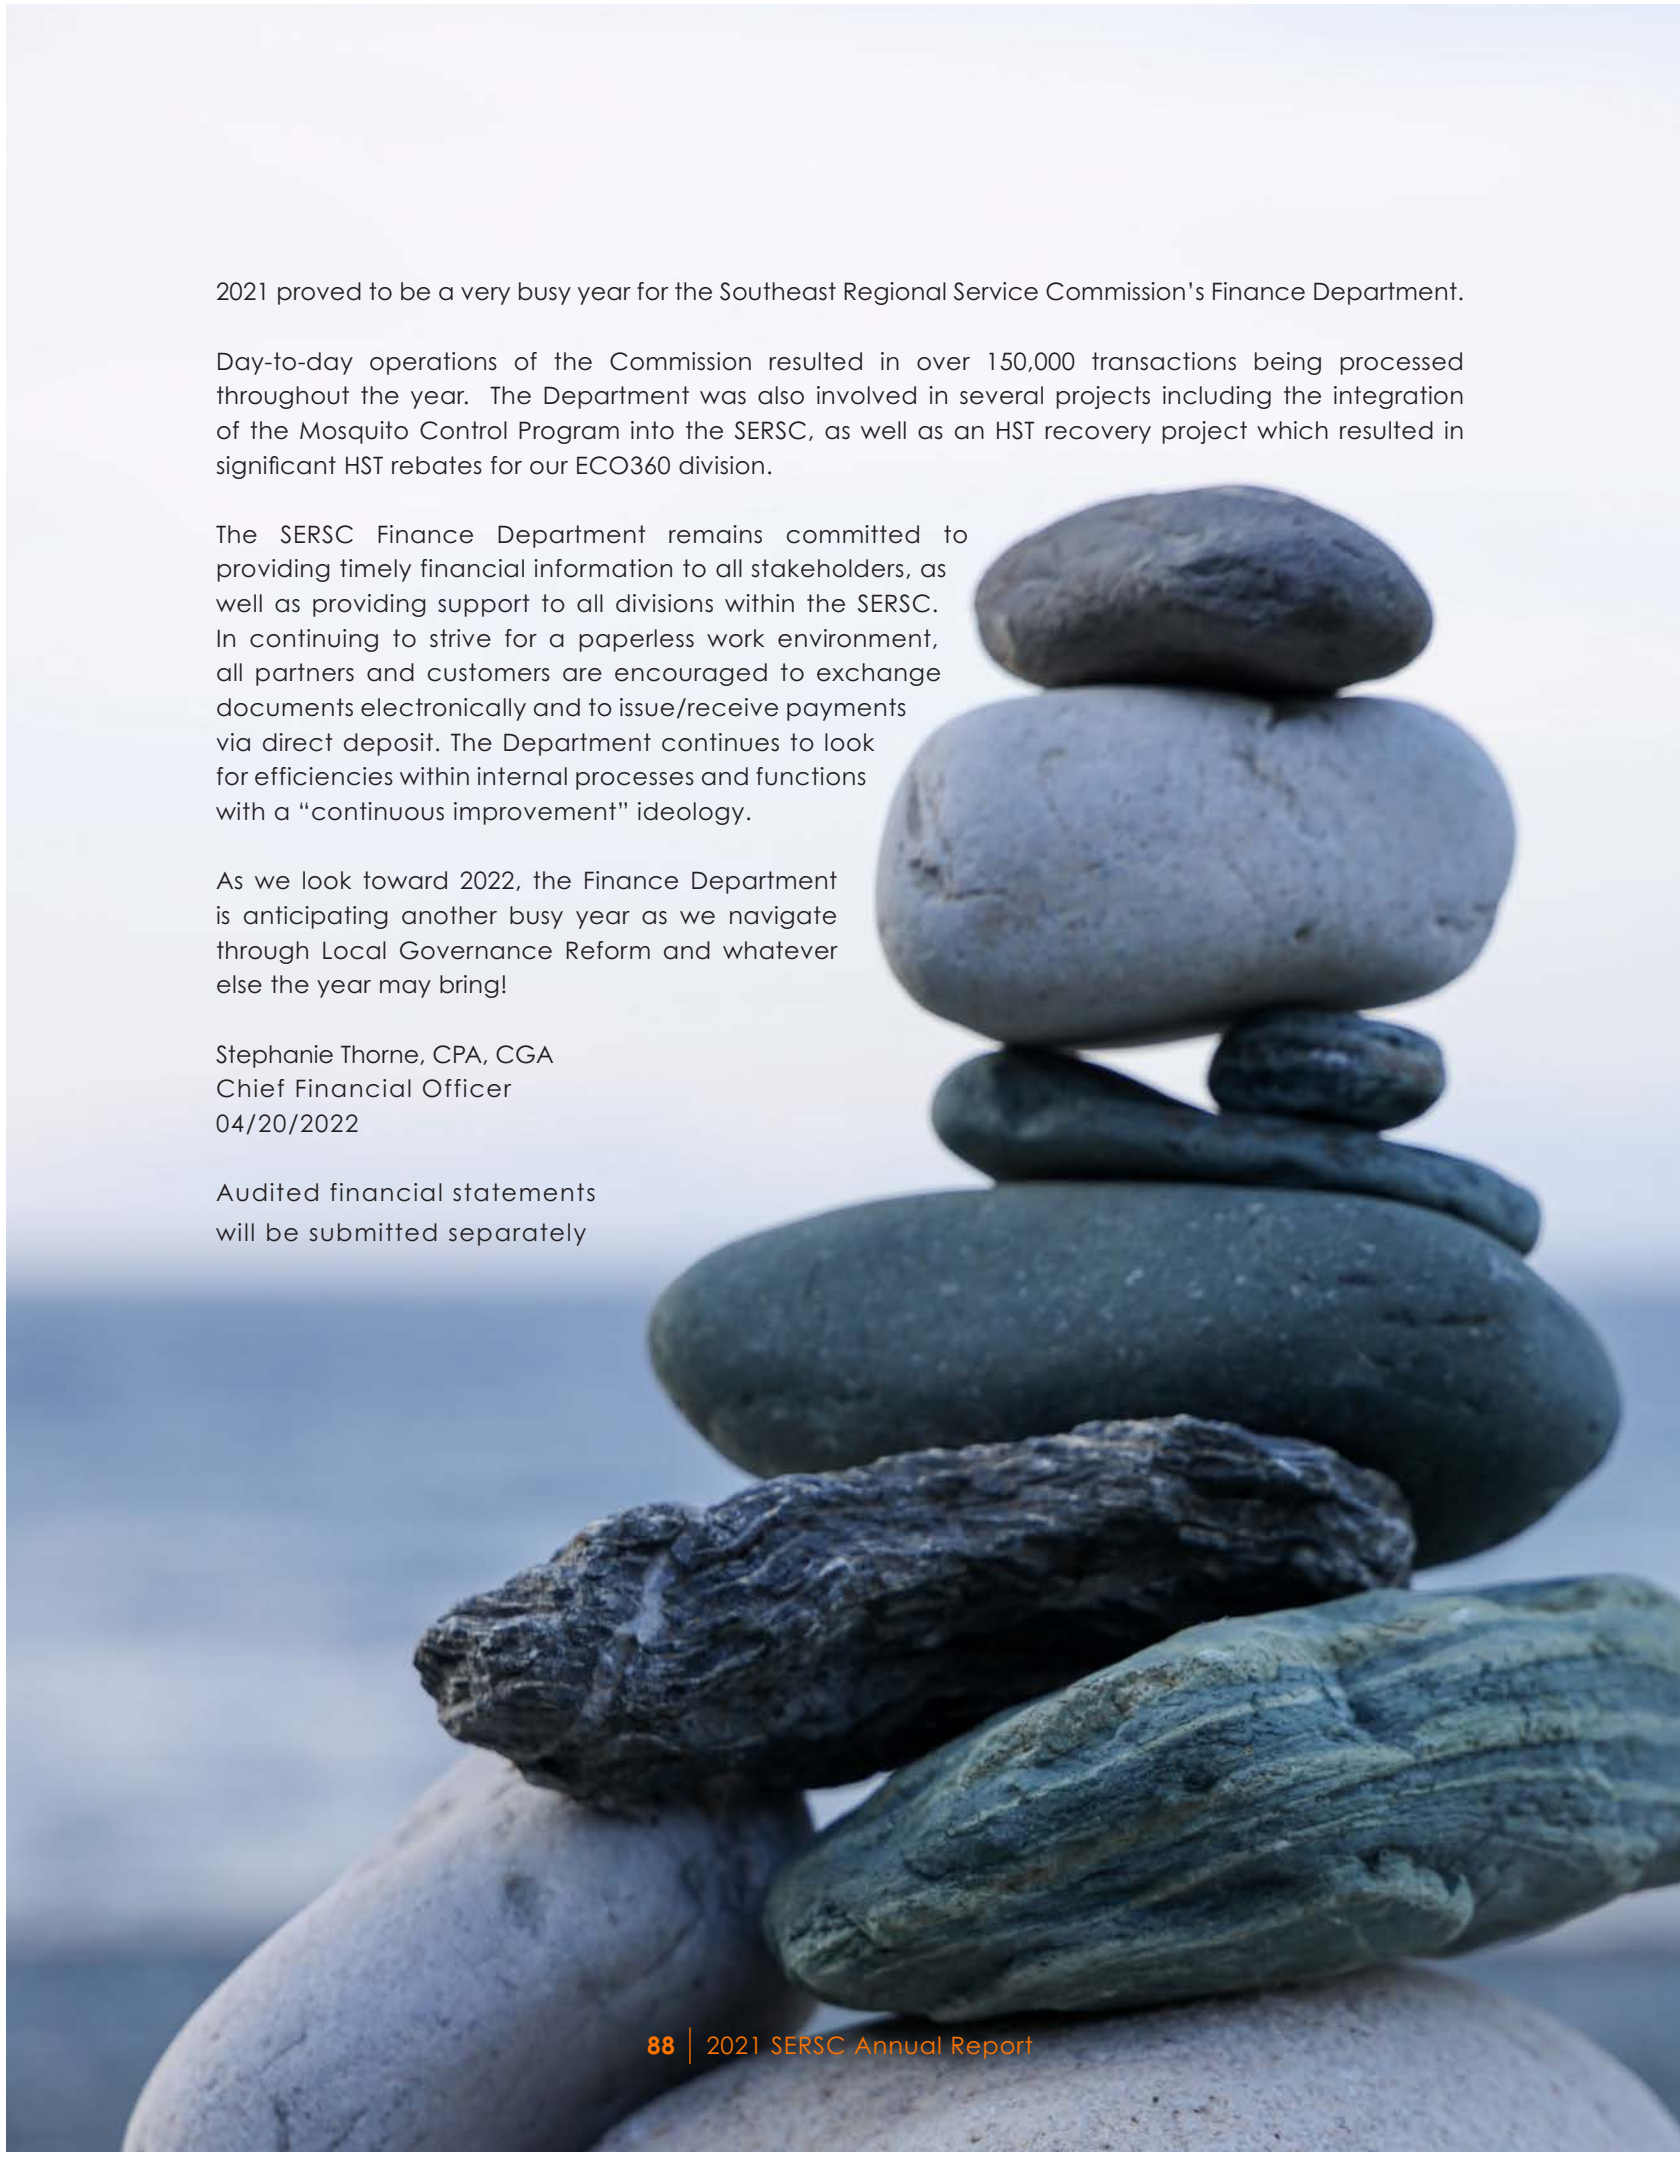

Day-to-day operations of the Commission resulted in over 150,000 transactions being processed throughout the year. The Department was also involved in several projects including the integration of the Mosquito Control Program into the SERSC, as well as an HST recovery project which resulted in significant HST rebates for our ECO360 division.

The SERSC Finance Department remains committed to providing timely financial information to all stakeholders, as well as providing support to all divisions within the SERSC. In continuing to strive for a paperless work environment, all partners and customers are encouraged to exchange documents electronically and to issue/receive payments via direct deposit. The Department continues to look for efficiencies within internal processes and functions with a "continuous improvement" ideology.

As we look toward 2022, the Finance Department is anticipating another busy year as we navigate through Local Governance Reform and whatever else the year may bring!

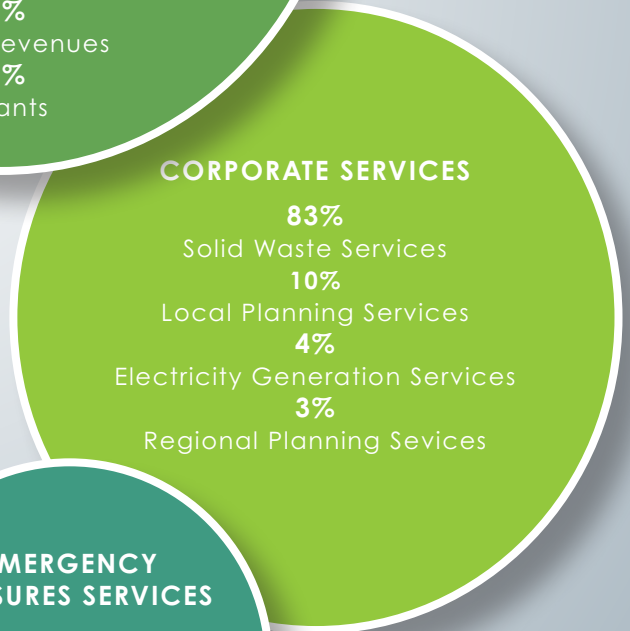

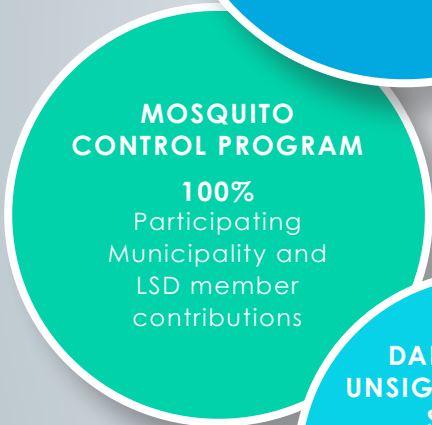

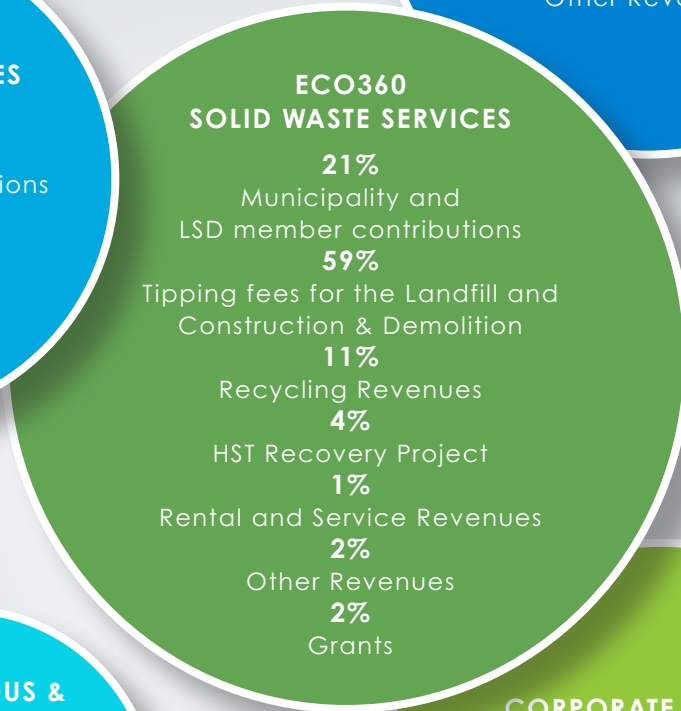

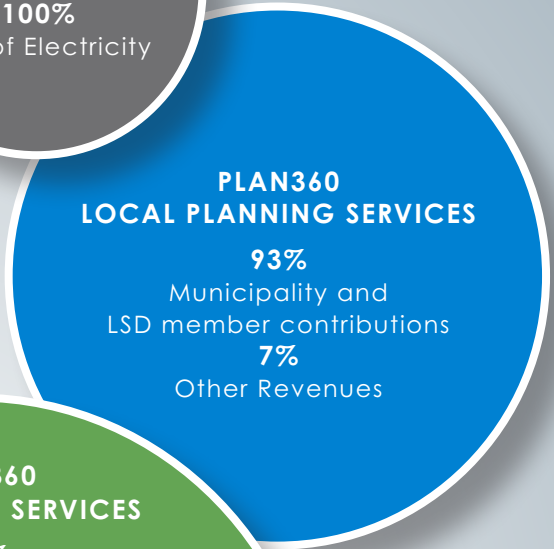

Stephanie Thorne, CPA, CGA  
Chief Financial Officer  
04/20/2022

Audited financial statements  
will be submitted separately

## FINANCING SUMMARY

The Southeast Regional Service Commission is financed through contributions from member municipalities, rural communities and local service districts for the services provided. Revenues are also generated through the sale of goods and services in the Solid Waste and Electricity Generation services, as well as grants sought for special projects. The breakdown of 2021 financing is as follows:

## GRANTS RECEIVED

### ENVIRONMENTAL TRUST FUND 2021/2022 - AWARDED PROJECTS

The Environmental Trust Fund provides assistance for action-oriented projects with tangible, measurable results, aimed at protecting, preserving and enhancing the Province's natural environment ([www.gnb.ca](http://www.gnb.ca)). Awarded projects run April 2021 - March 2022. Financial claims are processed in March 2022 for all project expenses. In keeping with Generally Accepted Accounting Principles, deferred revenue is recorded at year-end for any expenses incurred in 2021.

#### COOPERATIVE & REGIONAL SERVICES

Rural Tantramar Climate Change Adaptaion Plan - Year 2	\$ 30,000
--	-----------

#### SOLID WASTE SERVICES

Outdoor Education Classrooms	\$ 15,000
------------------------------	-----------

#### REGIONAL TRAIL COUNCIL

Department of Tourism, Heritage & Culture - Signature Trail: Shore Line Trail	\$ 350,000
---	------------

#### LOCAL PLANNING

Regional Development Corporation (RDC) - Online permitting system 2021/2022 - Year 1	\$ 23,112
---	-----------

<b>TOTAL Other Grants</b>	<b>\$373,112</b>
---------------------------	------------------

## LOCAL PLANNING SERVICES

Local Planning Services are provided to all Southeast Regional Service Commission members, with the exception of the City of Moncton and the City of Dieppe, who have their own land-use planning departments. The annual costs for Local Planning Services are allocated based on the previous years' tax base of the municipality, rural community or local service district. Local Planning revenues (i.e permit fees) are collected by the Southeast Regional Service Commission on behalf of participating members and are remitted to members on a quarterly basis.

MUNICIPALITIES	LOCAL PLANNING COSTS	LOCAL PLANNING REVENUES (remitted quarterly)	NET COST OF LOCAL PLANNING SERVICE
	2021	2021	
Alma	\$ 9,883	\$ 5,051	\$ 4,832
Beaubassin East Rural Community	\$ 215,817	\$ 115,041	\$ 100,776
Cap-Pelé	\$ 68,458	\$ 72,653	\$ (4,195)
Dorchester	\$ 19,615	\$ 764	\$ 18,851
Hillsborough	\$ 28,504	\$ 4,681	\$ 23,823
Memramcook	\$ 107,020	\$ 55,794	\$ 51,226
Petitcodiac	\$ 30,456	\$ 16,818	\$ 13,638
Port Elgin	\$ 8,275	\$ 3,699	\$ 4,576
Riverside-Albert	\$ 7,432	\$ 8,400	\$ (968)
Riverview	\$ 366,366	\$ 357,920	\$ 8,446

Salisbury	\$ 59,632	\$ 13,990	\$ 45,642
Shediac	\$ 225,042	\$ 330,255	\$ (105,213)
Local Service Districts	\$ 908,498	\$ 392,139	\$ 516,359
<b>TOTAL</b>	<b>\$ 2,271,519</b>	<b>\$ 1,424,257</b>	<b>\$ 847,262</b>

## SOLID WASTE SERVICES

Solid Waste disposal services are provided to all Southeast Regional Service Commission members. The cost to members for this services is based on the numbers of residential households the municipality, rural community or local service district collects and brings to the Solid Waste facility in Berry Mills for disposal. The Residential Waste fee for 2021 was set at \$56.00/residential household; a \$1.00 decrease from 2020. A transportation subsidy is granted to members based on their distance from the solid waste disposal facility located in Berry Mills. An additional \$4.00/unit for education and transportation programs is charged to members with residential complexes in their area.

MEMBERS	HOUSEHOLDS	RATE	TOTAL REVENUE
<b>Alma</b>	184	\$ 56.00	\$ 10,304
